## SECTION 12: Ecological information

### 12.1 Toxicity

#### Assessment:

Evaluation on basis of physical-chemical properties: No expected damaging effects to aquatic organisms. D4 is an unavoidable contamination in the manufacture of silicone polymers and leads to adverse effects on aquatic organisms under laboratory conditions. It could be shown experimentally that, from a polysiloxane matrix with up to 3% D4, taking into account the silicone/water partition equilibrium, it is not possible to reach a concentration of D4 in water that would lead to chronic ecotoxicity effects in a corresponding OECD study. Accordingly, D4 does not contribute to a hazard from silicone polymers up to this limit."

### 12.2 Persistence and degradability

#### Assessment:

Polymer component: biologically not degradable. Elimination by adsorption to activated sludge.

### 12.3 Bioaccumulative potential

#### Assessment:

Polymer component: No adverse effects expected.

### 12.4 Mobility in soil

#### Assessment:

Polymer component: insoluble in water.

### 12.5 Results of PBT and vPvB assessment

No data available.

### 12.6 Endocrine disrupting properties

The substance/mixture does not contain components considered to have endocrine disrupting properties according to REACH Article 57(f) or Commission Delegated regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605 at levels of 0.1% or higher.

### 12.7 Other adverse effects

none known

## SECTION 13: Disposal considerations

### 13.1 Waste treatment methods

#### 13.1.1 Material

##### Recommendation:

Material that cannot be used, reprocessed or recycled should be disposed of in accordance with Federal, State, and local regulations at an approved facility. Depending on the regulations, waste treatment methods may include, e.g., landfill or incineration.

#### 13.1.2 Uncleaned packaging

##### Recommendation:

Completely discharge containers (no tear drops, no powder rest, scraped carefully). Containers may be recycled or re-used. Observe local/state/federal regulations. Uncleaned packaging should be treated with the same precautions as the material.

#### 13.1.3 Waste Disposal Legislation Ref.No.(EC)
